Product Brochure

EVERYTHING WE DO

We believe in thinking differently
Challenging the status quo,
keep breaking through
Can make the company maintain development
The way we challenge the status quo
Is by making our products better quality,
more high-class texture and designed innovatively.
We just happen to make our great tiles.

私たちが行うことはすべて、顧客がより良いタイルを
手に入れることができるようにすることです
私たちは違った考え方を信じています、
現状に挑戦し、突破し続ける勇気を持ち、
そうして初めて、より良い製品を作ることができます。
現状に挑戦する方法、
私たちの製品をより良い品質とより高いものにすることです
グレードの質感とより革新的なデザイン。
このプロセスで、私たちは最高のタイルを作りました。

Our motivation is to provide our partners and clients
with high-quality ceramic tiles and a continuous supply of goods.
There used to be many customers who used unqualified and
cheap products, which caused problems with the products.
Led to the breakdown of the entire project, which affected the
construction period and even lost cooperation opportunities.
Eventually affect the company's credibility. Therefore,
we have deep understanding of the importance of product quality.

There are new aesthetic suggestions every year, and we are
always creating new trends and market demands. We hope
we can lead the development of the mosaic market.

The Antique

In a world where everything is new, we naturally try to find something old. All the old, spotted, dusty things assemble the magic of calm. Indeed, time is always going to make everything old, but the antique feeling never fades.

誰が甲とこののはことだ。ガラスのカーテンウォールで慕結されを世界から、ガラスをあります。時代の古くてでらでほこりひいものは、私たちをする沖PIN 實邪、時はこのの載物を古くします。運です。

Attention on tiling ●If the product needs to be cut during the paving process, please use a tile cutter or glass cutter for the cut surface, and polish the cut surface with a grindstone to avoid injury. ●Please do not use a sander to cut, because it may cause accidents or product damage, and is very dangerous.
●舗装中に切断が必要な場合は、切断面にタイルカッターまたはガラスカッターを使用し、けがをしないように砥石で切断面を研磨してください。●サンダーを使用して切断しないでください。

Regarding customized products ●we will produce after ordering, so please check the delivery date. We support mixed patterns, and the price will vary according to the number and proportion of mixed colors, please pay attention.
●カスタマイズ商品はご注文後にお買い物させていただきますので、お届け日をご確認ください。固定写真以外の混合パターンにも対応しており、混合色の数や比率によって価格が異なりますのでご注意ください。

Precautions for the product ●Because of the different batches of the product, the purity of the white color will be slightly different. ●Because of the product's batch, the purity of the white color will be slightly different. ●Because of the craftsmanship, the color difference and poor gloss of the tiles will appear, especially in the white construction site. This is a normal phenomenon. ●Before paving, our quality inspection department will conduct regular quality inspections to ensure the color and luster effect meet the application standards. ●Do not use acidic or alkaline cleaners for maintenance.

For products with high anti-slip properties ●because the texture of the surface of the object can easily jam the fibers of the cleaning product, please do not use cleaning tools such as mops.

Guideline for Mosaic Tile Paving

1.SKIMMING

This is a step that serves to render the substrate selected for tiling perfectly smooth, uniform and white (a substrate showing differences in color will spoil the appearance of the finished mosaic).

2.STARTING LINES

Draw lines on the surface of the substrate to aid correct positioning of the sheets. Lay three sheets out the floor side by side, so that the gap between the sheets is the same as the gap between the single tessera, and measure the overall width. Transfer this measurement both horizontally and vertically to the surface being covered and using a straightedge and a spirit level, mark out a grid, the area will now be divided into a number of squares, each corresponding to nine sheets of mosaic.

3.PREPARING THE ADHESIVE

Prepare the adhesive, and spread over an area no larger than will be occupied by the first nine sheets, using the trowel. First apply a thick coat with the smooth edge of the tool, drawing the teeth across evenly and “combing” the adhesive to produce a uniformly ridged bed. The sheets can now be positioned.

4.LAYING AND FIXING

The sheets are back-mounted to a mesh that should be directly applied to the bed of adhesive. On walls, the thicker strands of mesh should be positioned vertically. Please note: the gap separating adjacent sheets must be the same as the gap between single tessera.

5.A FIRM BOND

With the sheets in place, tap the tessera home with a float so that the mesh beds firmly into the adhesive.

6.A PERFECT END RESULT

With all the sheets laid or fixed, and before the adhesive begins to set, the distance between tessera can be adjusted to ensure that all gaps are of uniform width. This is done by cutting through the mesh along the gap with a knife and edging the adjoining tessera marginally closer together or farther apart with the aid of a trowel. This is a step of the mosaic tiling procedure that calls for patience, but one that also adds considerable value to the finished job.

7.GROUTING

Make sure to use all of the grout. Using the small trowel, scoop the grout, a little at a time, onto the float and begin applying to the mosaic. Move the tool diagonally across the tessera, first from the bottom up and then squeegee downwards in the opposite direction, making certain that all of the joints are completely filled and that no excess remains.

8.CLEANING

Before the grout hardens, begin cleaning off the surface. Prepare two buckets of this solution: immerse the pad in the first, and without wringing, swab the surface of the mosaic repeatedly with a circular motion. Next, immerse the sponge in the second bucket and wipe down the surface, removing all residual traces of grout. Finally, wipe down with the sponge, this time using clean water to remove any smears, leaving the mosaic sparklingly clean.
